

HSPT Exam Simulator

Full-Length Practice Exam 02

Complete printable test with 298 multiple-choice questions, answer key, and detailed explanations.

Section	Questions	Time
Verbal Skills	60	20 minutes
Quantitative Skills	52	35 minutes
Reading Comprehension	62	35 minutes
Mathematics	64	45 minutes
Language	60	30 minutes

General Directions

Work through each section within the recommended time. Choose the best answer for every question. Mark one answer (A-D) for each item. Use the answer key and explanations only after completing the test.

Recommended total testing time: 165 minutes. Calculators should be used only when permitted by the rules followed for your HSPT preparation.

Section 1: Verbal Skills

60 questions | Recommended time: 20 minutes

1. Which word is closest in meaning to prudent?

- A) noisy
- B) sensible
- C) generous
- D) speedy

2. Which word is closest in meaning to commence?

- A) begin
- B) discuss
- C) cancel
- D) delay

3. Which word is closest in meaning to evident?

- A) doubtful
- B) hidden
- C) apparent
- D) distant

4. Which word is most nearly opposite in meaning to optimistic?

- A) patient
- B) cheerful
- C) hopeful
- D) pessimistic

5. Which word is most nearly opposite in meaning to permit?

- A) forbid
- B) request
- C) explain
- D) enter

6. Which word is most nearly opposite in meaning to shallow?

- A) calm
- B) narrow
- C) deep
- D) clear

7. Keyboard is to type as telescope is to ____.

- A) observe
- B) travel
- C) calculate
- D) record

8. Chef is to restaurant as judge is to ____.

- A) law
- B) courtroom
- C) decision
- D) jury

9. Flour is to wheat as paper is to ____.

- A) book
- B) sheet
- C) pen
- D) wood

10. Which choice is the only word outside the group?

- A) gallon
- B) liter
- C) kilogram
- D) quart

11. Which word belongs with honest, truthful, and sincere?

- A) doubtful
- B) candid
- C) playful
- D) secretive

12. January, April, and October share which objective characteristic?

- A) They are weekdays.
- B) They are seasons.
- C) They are months.
- D) They are holidays.

13. A code uses exactly three symbols. The star appears before the circle. The triangle appears after the circle. Which symbol is last?

- A) circle
- B) star
- C) The position is unknown.
- D) triangle

14. Every copper key opens cabinet P. Key R does not open cabinet P. Which conclusion must be true?

- A) Key R is not copper.
- B) Cabinet P is locked.
- C) No key opens cabinet P.
- D) Key R opens another cabinet.

15. A meeting is scheduled for Tuesday, Thursday, or Saturday. It cannot occur Tuesday if Mira attends, and it can occur Saturday only if Leo attends. Mira attends, but Leo does not. When must the meeting occur?

- A) Saturday
- B) Thursday
- C) Tuesday
- D) It cannot occur.

16. Which word is closest in meaning to meticulous?

- A) rapid
- B) careful
- C) ordinary
- D) cheerful

17. Which word is closest in meaning to adjacent?

- A) hidden
- B) unequal
- C) neighboring
- D) distant

18. Which word is closest in meaning to compensate?

- A) predict
- B) combine
- C) observe
- D) repay

19. Which word is most nearly opposite in meaning to hostile?

- A) friendly
- B) silent
- C) crowded
- D) powerful

20. Which word is most nearly opposite in meaning to maximum?

- A) average
- B) minimum
- C) total
- D) limit

21. Which word is most nearly opposite in meaning to ascend?

- A) arrive
- B) continue
- C) descend
- D) wander

22. Nest is to bird as den is to ____.

- A) forest
- B) cave
- C) cub
- D) bear

23. Edit is to manuscript as prune is to ____.

- A) hedge
- B) shears
- C) branch
- D) garden

24. Minute is to hour as centimeter is to ____.

- A) distance
- B) meter
- C) ruler
- D) millimeter

25. Which word differs in category from the other three?

- A) clear
- B) transparent
- C) opaque
- D) translucent

26. Which word belongs with canoe, ferry, and sailboat?

- A) wagon
- B) subway
- C) glider
- D) barge

27. Copper, gold, and aluminum share which category?

- A) metals
- B) gases
- C) fabrics
- D) stones

28. Exactly one of Arun and Bella leads. If Bella leads, Chen records notes. Chen is not recording notes. Who must lead?

- A) Bella
- B) Arun
- C) Chen
- D) The leader cannot be determined.

29. All blue cards are numbered. No numbered card is blank. Which conclusion must be true?

- A) Every numbered card is blue.
- B) Some blank cards are blue.
- C) No blue card is blank.
- D) No card is numbered.

30. Four books W, X, Y, and Z are stacked. W is above X. Y is below X. Z is above W. Which book is second from the top?

- A) X
- B) Y
- C) Z
- D) W

31. Which word is closest in meaning to vivid?

- A) striking
- B) fragile
- C) silent
- D) formal

32. Which word is closest in meaning to scarce?

- A) polished
- B) useful
- C) limited
- D) nearby

33. Which word is closest in meaning to allocate?

- A) divide
- B) delay
- C) replace
- D) assign

34. Which word is most nearly opposite in meaning to vertical?

- A) narrow
- B) horizontal
- C) steady
- D) plain

35. Which word is most nearly opposite in meaning to deliberate?

- A) protect
- B) gradual
- C) measured
- D) accidental

36. Which word is most nearly opposite in meaning to compulsory?

- A) optional
- B) recent
- C) uncertain
- D) ordinary

37. Battery is to flashlight as fuel is to ____.

- A) vehicle
- B) motion
- C) engine
- D) piston

38. Bud is to flower as egg is to ____.

- A) nest
- B) butterfly
- C) shell
- D) wing

39. Thermometer is to temperature as compass is to ____.

- A) direction
- B) distance
- C) weather
- D) speed

40. Which term does not belong with the other three?

- A) peninsula
- B) island
- C) harbor
- D) isthmus

41. Which word belongs with soprano, alto, and tenor?

- A) chorus
- B) melody
- C) rhythm
- D) bass

42. Rectangle, trapezoid, and kite share which category?

- A) triangles
- B) solids
- C) quadrilaterals
- D) circles

43. Mira, Owen, and Paz each choose one different workshop: art, coding, or drama. Mira does not choose art. Owen chooses coding. Which workshop must Paz choose if Mira chooses drama?

- A) art
- B) coding
- C) drama
- D) The answer cannot be determined.

44. If the alarm is armed, opening the door triggers a bell. The door opens, but no bell sounds. Which conclusion follows?

- A) The door is locked.
- B) The alarm is not armed.
- C) The bell is louder outside.
- D) Someone closed the door.

45. Five runners finish with J before K, K before L, and M before J. N finishes after L. Who must finish first?

- A) J
- B) K
- C) N
- D) M

46. Which word is closest in meaning to impartial?

- A) uncertain
- B) unbiased
- C) impatient
- D) unprepared

47. Which word is closest in meaning to abundant?

- A) colorful
- B) distant
- C) plentiful
- D) careless

48. Which word is closest in meaning to inevitable?

- A) unavoidable
- B) easy to change
- C) likely to improve
- D) ready to depart

49. Which word is most nearly opposite in meaning to ancient?

- A) smooth
- B) fragile
- C) distant
- D) modern

50. Which word is most nearly opposite in meaning to unanimous?

- A) formal
- B) accurate
- C) divided
- D) public

51. Which word is most nearly opposite in meaning to include?

- A) arrange
- B) exclude
- C) measure
- D) protect

52. Itinerary is to journey as outline is to ____.

- A) speech
- B) audience
- C) pencil
- D) stage

53. Odometer is to distance as scale is to ____.

- A) height
- B) balance
- C) speed
- D) weight

54. Roof is to house as lid is to ____.

- A) shelf
- B) handle
- C) jar
- D) label

55. Which word does not belong with the other three?

- A) violin
- B) lantern
- C) trumpet
- D) flute

56. Which word belongs with copper, iron, and silver?

- A) tin
- B) glass
- C) clay
- D) rubber

57. Which pair has the same relationship as calf and cow?

- A) cub and den
- B) feather and bird
- C) stable and horse
- D) foal and horse

58. All members of the robotics club attend the safety meeting. Inez is a robotics club member. What must be true?

- A) Inez leads the meeting.
- B) Only club members attend.
- C) Inez attends the safety meeting.
- D) Inez built every robot.

59. Four books—J, K, L, and M—stand on a shelf. J is left of K. M is right of K. L is left of J. Which book is farthest left?

- A) J
- B) K
- C) M
- D) L

60. No glass objects are flexible. Some rulers are flexible. Which conclusion follows?

- A) All rulers are glass.
- B) Some rulers are not glass.
- C) No rulers are glass.
- D) All flexible objects are rulers.

Section 2: Quantitative Skills

52 questions | Recommended time: 35 minutes

61. What number comes next? 12, 15, 21, 30, 42, ____

- A) 54
- B) 60
- C) 57
- D) 63

62. What number comes next? 2, 10, 50, 250, ____

- A) 750
- B) 1,250
- C) 1,000
- D) 500

63. What number comes next? 54, 51, 45, 36, 24, ____

- A) 9
- B) 12
- C) 6
- D) 3

64. What number comes next? 4, 7, 14, 17, 34, 37, ____

- A) 40
- B) 68
- C) 71
- D) 74

65. Which number has exactly six positive factors?

- A) 20
- B) 16
- C) 25
- D) 27

66. If 8 notebooks cost \$14, what is the cost of 20 notebooks at the same rate?

- A) \$28
- B) \$35
- C) \$40
- D) \$42

67. What value is 30% less than 90?

- A) 27
- B) 54
- C) 63
- D) 70

68. Quantity A: $7/9 + 1/6$. Quantity B: $17/18$.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

69. p is an integer. Quantity A: $p + 9$. Quantity B: $3p$.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

70. Quantity A: $\sqrt{144} + 3$. Quantity B: 2×8 .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

71. A regular pentagon has perimeter 45 units. Quantity A: one side length. Quantity B: 8 units.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

72. A triangle has angles of 50° , 60° , and 70° . Quantity A: its largest angle. Quantity B: the sum of its two smaller angles.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

73. A rectangular prism has length 5, width 2, and height h . Quantity A: its volume. Quantity B: 30 cubic units.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

74. What number comes next? 8, 13, 23, 38, 58, ____

- A) 73
- B) 78
- C) 83
- D) 88

75. What number comes next? 729, 243, 81, 27, ____

- A) 3
- B) 6
- C) 12
- D) 9

76. What number comes next? 1, 2, 6, 24, 120, ____

- A) 720
- B) 240
- C) 600
- D) 840

77. Which value makes $4/9 = n/63$ true?

- A) 21
- B) 28
- C) 32
- D) 36

78. A number is divided by 0.25 and the result is 36. What is the number?

- A) 4
- B) 12
- C) 9
- D) 144

79. Which number leaves a remainder of 2 when divided by 7?

- A) 21
- B) 28
- C) 35
- D) 30

80. A quantity changes from 150 to 120. What is the percent decrease?

- A) 15%
- B) 20%
- C) 25%
- D) 30%

81. Quantity A: $3/4$ of 72. Quantity B: 50.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

82. Quantity A: $|-11| + 4$. Quantity B: 3×5 .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

83. t is a real number. Quantity A: t^2 . Quantity B: t .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

84. A rhombus has side length 6. Quantity A: its perimeter. Quantity B: 26.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

85. A triangle has base 10 and height 7. Quantity A: its area. Quantity B: 30.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

86. A square has side length s . Quantity A: its perimeter. Quantity B: $4s$.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

87. What number comes next? 4, 7, 13, 22, 34, ____

- A) 46
- B) 48
- C) 52
- D) 49

88. What number comes next? 3, 12, 10, 40, 38, ____

- A) 76
- B) 152
- C) 144
- D) 156

89. What number comes next? 2, 5, 4, 10, 8, 20, ____

- A) 18
- B) 24
- C) 16
- D) 40

90. What number comes next? $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{4}$, ____

- A) $1\frac{1}{3}$
- B) $1\frac{3}{4}$
- C) 2
- D) $1\frac{1}{2}$

91. Which expression is equivalent to 35% of 80?

- A) 35×80
- B) 0.035×80
- C) 0.35×80
- D) 3.5×80

92. If 5 notebooks cost \$13.75, what is the cost of 8 at the same rate?

- A) \$18.75
- B) \$22.00
- C) \$21.50
- D) \$27.50

93. A positive integer is divisible by both 6 and 8. Which number must be a factor of it?

- A) 14
- B) 36
- C) 48
- D) 24

94. Quantity A: $2\Box$. Quantity B: 5^2 .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

95. Quantity A: the median of 3, 9, 11, 18, 30. Quantity B: 11.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

96. p is a positive number less than 1. Quantity A: p . Quantity B: p^2 .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

97. A rectangle has area 48 square units and integer side lengths. Quantity A: its perimeter. Quantity B: 28 units.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

98. An isosceles triangle has two angles of 50° . Quantity A: its third angle. Quantity B: 75° .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

99. A cube has edge length 3. Quantity A: its volume. Quantity B: its surface area.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

100. What number comes next? 90, 45, 47, 23.5, 25.5, ____

- A) 12.75
- B) 11.75
- C) 13.5
- D) 51

101. What number comes next? 6, 11, 21, 41, 81, ____

- A) 121
- B) 151
- C) 162
- D) 161

102. What number comes next? 1, 8, 27, 64, ____

- A) 81
- B) 100
- C) 125
- D) 144

103. What number comes next? 3, 8, 15, 24, 35, ____

- A) 44
- B) 48
- C) 46
- D) 50

104. A jacket priced at \$60 is discounted 20%, then \$5 is subtracted with a coupon. What is the final price?

- A) \$43
- B) \$38
- C) \$45
- D) \$47

105. Of the following representations, which has the greatest value?

- A) 0.8
- B) 81%
- C) $\frac{4}{5}$
- D) $\frac{5}{6}$

106. A number leaves a remainder of 2 when divided by 5. Which could be the number?

- A) 35
- B) 40
- C) 47
- D) 53

107. Quantity A: $|-9| - 4$. Quantity B: $|-4| + 2$.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

108. $x = y + 2$. Quantity A: x . Quantity B: y .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

109. $x + y = 12$. Quantity A: x . Quantity B: y .

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

110. A square and an equilateral triangle each have perimeter 24. Quantity A: one side of the square plus 2. Quantity B: one side of the triangle.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

111. A circle has radius 7. Quantity A: its diameter. Quantity B: 12.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

112. A triangle has angles 35° , 65° , and 80° . Quantity A: its largest angle. Quantity B: a right angle.

- A) Quantity A is greater.
- B) Quantity B is greater.
- C) The two quantities are equal.
- D) The relationship cannot be determined from the information given.

Section 3: Reading Comprehension

62 questions | Recommended time: 35 minutes

Literary Passage: The Missing Color

Eli's mural design showed the community garden in late summer: orange squash, purple beans, and red tomatoes beneath a bright blue sky. On painting day, however, he discovered that the box of supplies contained no blue paint.

"We can postpone the sky," suggested Mina, his partner. But rain was forecast for the next afternoon, and the outdoor wall needed time to dry. Eli looked at the remaining colors. Mixing green and white produced mint, not blue. Black made it muddy.

Mina held a sheet of silver paint samples against the wall. "What if the sky isn't daytime?" she asked. They covered the upper half of the mural with deep violet, then added silver dots and a pale moon. The vegetables below seemed brighter against the evening sky. Children passing through the garden began pointing out shapes they imagined among the stars.

When the mural was finished, Eli found the missing blue jar behind a supply crate. For a moment, he pictured painting over the violet. Then a child announced that three silver dots looked exactly like a watering can. Eli closed the blue jar and placed it back in the box.

113. Why do Eli and Mina avoid postponing the sky?

- A) The garden will close permanently.
- B) Rain is expected, and the wall needs drying time.
- C) The silver paint will expire.
- D) Children are waiting to paint the vegetables.

114. Why does Eli decide not to use the blue paint after finding it?

- A) The jar contains too little paint.
- B) Mina asks him to return it.
- C) He values the unexpected result they created.
- D) The wall is already wet from rain.

115. As used in the third paragraph, held most nearly means ____.

- A) positioned
- B) owned
- C) delayed
- D) supported emotionally

116. The missing blue paint mainly serves as ____.

- A) evidence that Eli is careless
- B) a symbol of the garden's decline
- C) a clue that rain will arrive
- D) a complication that prompts a creative solution

117. Which statement most accurately expresses the passage's central idea?

- A) Outdoor art should use only realistic colors.
- B) Unexpected limits can lead to worthwhile new ideas.
- C) Supplies should always be checked weeks in advance.
- D) Children understand paintings better than artists do.

Informational Passage: The Return of the Oyster Reef

Oysters are often thought of only as seafood, but living oysters can build reef-like structures in shallow coastal water. Young oysters attach to hard surfaces, including older oyster shells. Over time, layers of shells form a rough habitat where small fish, crabs, and other organisms can shelter.

Oyster reefs can also change the movement of water. Their uneven surfaces slow some waves before those waves reach the shore. This does not make reefs an absolute barrier against storms, but it may reduce everyday erosion in suitable locations. As oysters feed, they draw water across their gills and remove tiny particles, which can improve water clarity.

In places where reefs have declined, restoration teams may place cleaned shells or specially shaped blocks on the bottom. These materials give young oysters a firm place to settle. Teams must choose sites carefully. Water that is too fresh, too polluted, or too deep may not support a healthy reef.

Restoration takes time, and results vary. A successful project depends on water conditions, oyster survival, and continued monitoring. When those factors align, a restored reef can provide habitat while becoming part of a coastline's natural protection system.

118. What gives young oysters a firm surface in restoration projects?

- A) Sand moved from beaches
- B) Floating plants
- C) Fresh water
- D) Cleaned shells or shaped blocks

119. How may oyster reefs reduce everyday erosion?

- A) Their rough surfaces slow some waves.
- B) They prevent all storms from reaching shore.
- C) They deepen the water near beaches.
- D) They remove every particle from the water.

120. Which description best matches the passage's organization?

- A) It ranks several coastal animals by importance.
- B) It explains reef benefits, restoration methods, and conditions for success.
- C) It narrates one oyster's life in chronological order.
- D) It argues that artificial barriers should replace reefs.

121. As used in the final paragraph, align most nearly means ____.

- A) are measured
- B) move apart
- C) work together favorably
- D) become permanent

122. Why is continued monitoring important after shells or blocks are placed?

- A) Conditions and oyster survival determine whether the reef develops.
- B) The materials must be removed every evening.
- C) Fish must be prevented from entering the reef.
- D) Monitoring causes water to become saltier.

Humanities Passage: Learning Through Imitation

Imitation is sometimes dismissed as the opposite of creativity. Yet copying a model has long been one way people learn difficult skills. A beginning musician repeats a teacher's phrasing; a young athlete studies an experienced player's movement; an art student may sketch a sculpture to understand its proportions. Useful imitation is not mindless duplication. The learner must notice decisions that an expert performs almost

automatically. Where does the musician pause? How does the athlete shift weight? Which lines make the sculpture appear balanced? Attempting the same choices makes hidden techniques easier to see. Eventually, a learner must adapt what has been observed. A pianist's hands differ from a teacher's, an athlete faces changing opponents, and an artist develops individual purposes. A copied method becomes limiting if it is never adjusted.

The relationship between imitation and originality is therefore not a simple contest. Imitation can provide a temporary structure, much as a railing supports someone learning to climb a steep staircase. The railing is valuable because it assists movement, not because the climber should hold it forever. In the same way, studying a model can help a learner gain enough control to make independent choices.

123. Why did the author most likely write this passage?

- A) To show that experts should keep their techniques secret
- B) To compare the difficulty of music, art, and sports
- C) To explain how imitation can support the development of independent skill
- D) To argue that learners should copy one model permanently

124. According to the passage, what must a learner eventually do?

- A) Stop observing experts entirely
- B) Select the easiest available skill
- C) Duplicate every detail accurately
- D) Adapt what has been observed

125. Which statement would the author most likely support?

- A) A model is most useful when it leads toward independent choices.
- B) Original work should never be influenced by earlier examples.
- C) Imitation requires less attention than invention.
- D) Skilled performers no longer learn from observing others.

126. As used in the third paragraph, limiting most nearly means ____.

- A) easy to measure
- B) restricting further development
- C) lasting only briefly
- D) difficult to remember

127. The comparison between imitation and a railing emphasizes that imitation ____.

- A) prevents learners from taking risks
- B) is necessary for every expert
- C) can provide temporary support during learning
- D) should be designed by the learner

128. What tone does the author use throughout the passage?

- A) amused and informal
- B) doubtful and impatient
- C) dramatic and alarmed
- D) thoughtful and balanced

Literary Passage: The Spare Key

Nadia was responsible for opening the robotics room before Saturday's practice. At the school entrance, she reached into her bag and found an empty key pocket. Her teammates would arrive in fifteen minutes. She retraced her route to the bus stop, watching the sidewalk. Nothing gleamed near the curb. Then she

remembered lending her ruler to Theo during Friday's class. She had opened the same pocket to put his ruler away.

Nadia called Theo, who checked beneath their classroom table with a custodian's help. The key was there, but the building was across town. Nadia expected practice to be canceled. Instead, teammate Sol messaged that the library's meeting room was available and their design software worked on tablets.

The team spent the morning revising code and drawing a new sensor mount. They could not assemble the robot, yet they solved two problems that had slowed them all week. On Monday, Nadia collected the key and attached it to a bright orange cord. She had learned two lessons: make important objects difficult to lose, and do not confuse a changed plan with a wasted day.

129. Where does Theo find the key?

- A) Beneath the classroom table
- B) At the bus stop
- C) Inside Nadia's tablet case
- D) Near the school entrance

130. Why does the team move to the library?

- A) It stores a second robot.
- B) It offers a place and tools for work that does not require the robot.
- C) Theo is already waiting there.
- D) The school forbids Saturday practice.

131. As used in the final paragraph, attached most nearly means ____.

- A) explained
- B) mailed
- C) fastened
- D) compared

132. The bright orange cord mainly symbolizes Nadia's ____.

- A) interest in team colors
- B) wish to replace the key
- C) fear of entering school
- D) decision to prevent the same mistake

133. Which statement most accurately gives the story's central idea?

- A) Adaptability can turn a setback into productive work.
- B) Plans succeed only when nothing changes.
- C) Technology makes keys unnecessary.
- D) Teamwork requires meeting at school.

Scientific Passage: How Fog Nets Collect Water

In some dry coastal regions, fog appears even when rain is scarce. Fog consists of tiny water droplets suspended in air. A fog net captures some of those droplets as wind carries them through a mesh panel. When droplets strike the mesh, they join with other droplets and grow heavier. Gravity pulls the water downward into a channel, which directs it toward a storage tank. The mesh must allow air to pass while providing enough surface for droplets to collect. A solid wall would force much of the moving air around it.

Fog nets do not create water, and their output varies. Wind speed, droplet size, mesh design, and the number of foggy hours all affect collection. The stored water may also require treatment, depending on how it will be used and what substances are present in the air or on the equipment.

Because performance depends on local conditions, planners test small collectors before installing a large

system. Where fog is frequent and other water sources are limited, nets can supplement rather than replace existing supplies.

134. What moves collected water from the mesh toward a channel?

- A) sunlight
- B) gravity
- C) electricity
- D) air pressure

135. Why would a solid wall be less effective than mesh?

- A) It would make droplets evaporate instantly.
- B) It could not stand outdoors.
- C) It would cause much of the air to flow around it.
- D) It would produce too much drinking water.

136. Which topic is developed throughout the fog-net passage?

- A) Why coastal rain is increasing
- B) How tanks manufacture fog
- C) Why mesh replaces all water systems
- D) How fog nets collect water and why their success varies

137. Why do planners test small collectors first?

- A) Local results help show whether a larger installation is worthwhile.
- B) Small nets always collect more water.
- C) Testing removes treatment needs.
- D) Large nets cannot be repaired.

138. Which summary most accurately represents the final paragraph?

- A) Fog nets work equally well everywhere.
- B) Testing helps determine where fog nets can usefully supplement water supplies.
- C) Existing supplies should be abandoned.
- D) Only large systems can be tested.

Informational Passage: The Work of Naming Places

Place names can preserve clues about landscape, language, and human history. A name may describe a physical feature, honor a person, recall an event, or carry forward a word from an earlier language. Yet names that seem permanent often have complicated histories.

The same river or mountain may have been known by several communities, each using a different name. Mapmakers sometimes selected one version for official documents, while local speakers continued using another. Spellings also changed when sounds from one language were represented in the alphabet of another. Researchers who study place names compare maps, letters, government records, and oral histories. No single source is automatically decisive. An old map may contain a copying error, while a story passed through families may preserve information absent from official records. Comparing sources helps researchers distinguish strong evidence from an appealing guess.

Studying names is therefore more than making a list. It means examining who used a name, when they used it, and why one version became widely recognized. A familiar label on a map may be the final layer of a much longer conversation.

139. Which statement best captures the central idea of the place-name passage?

- A) Official maps always preserve the earliest name.
- B) Every physical feature has only one valid name.
- C) Place-name research combines varied sources to uncover complex naming histories.
- D) Spellings never change between languages.

140. Which sources do researchers compare?

- A) Only modern road signs
- B) Weather reports and novels
- C) Photographs and recipes
- D) Maps, letters, government records, and oral histories

141. Why is no single source automatically decisive?

- A) Each kind of source may contain errors or omit information.
- B) All sources use identical names.
- C) Official records are always fictional.
- D) Oral histories cannot preserve facts.

142. As used in the third paragraph, preserve most nearly means ____.

- A) invent
- B) keep
- C) hide
- D) shorten

143. Calling a map label the “final layer” suggests that it ____.

- A) was printed with thick ink
- B) cannot ever change
- C) rests on earlier names and decisions
- D) covers the landscape physically

144. How does the author develop the discussion?

- A) By ranking names from shortest to longest
- B) By narrating one explorer’s journey
- C) By giving rules for inventing names
- D) By introducing varied name origins, describing conflicting versions, and explaining research methods

Literary Passage: The Unfinished Map

Leah had promised to draw a map for visitors to the neighborhood garden, but the paths looked different each time she arrived. Wheelbarrows blocked one route; newly planted beds narrowed another. Her first careful sketch was already inaccurate.

She considered waiting until the garden was finished. Mr. Alvarez, who coordinated the volunteers, laughed gently. “A garden is never finished,” he said. Instead of drawing every temporary object, he suggested marking dependable landmarks: the stone fountain, the tool shed, and the three old pear trees.

Leah walked the paths again. She noticed that each landmark could be seen from at least one major turn. She redrew the map with bold symbols and added a note explaining that smaller paths might shift during planting days.

On Saturday, a family used the map to find the herb beds without asking for directions. Leah spotted a wheelbarrow resting directly across the route she had drawn. For a moment she frowned. Then the family looked toward the pear-tree symbol, chose the next path, and continued. The map was not a perfect picture of the

garden. It was something more useful: a guide that could survive change.

145. Which landmarks does Mr. Alvarez recommend marking?

- A) The gate, pond, and benches
- B) The fountain, tool shed, and pear trees
- C) Every wheelbarrow and flower bed
- D) Only the garden entrance

146. Why does Mr. Alvarez say a garden is never finished?

- A) No one knows how to complete a map.
- B) Visitors continually damage the plants.
- C) The garden has no boundaries.
- D) Its arrangement continues to change as people work.

147. As used in the last paragraph, survive most nearly means ____.

- A) remain useful despite
- B) hide from
- C) be repaired after
- D) grow beside

148. The wheelbarrow in the final paragraph mainly serves to ____.

- A) show that visitors ignored the map
- B) prove the garden should close
- C) test whether Leah's revised map can handle change
- D) explain why the fountain was moved

149. Which statement best expresses the passage's central idea?

- A) Maps should record every temporary detail.
- B) Gardens are easier to navigate without paths.
- C) Visitors prefer verbal directions to symbols.
- D) A useful solution can emphasize stable information instead of impossible precision.

Narrative Passage: A Different Rehearsal

When the youth orchestra lost access to the auditorium, Tomas expected the evening rehearsal to be canceled. Their new location, a carpeted community room, had no stage and made every instrument sound strangely quiet. The conductor, Ms. Bell, arranged the chairs in a circle rather than their usual rows. Without the auditorium's echo, Tomas could hear small details in his own clarinet playing: a breath arriving too early, a note beginning without confidence. He also heard the cellos' rhythm more clearly. During a difficult passage, Ms. Bell asked everyone except the cellos to stop. Then she added each section back one at a time. By the end of rehearsal, the orchestra still sounded less powerful than it did onstage. Yet the musicians understood how their separate parts supported one another. At the next auditorium rehearsal, Tomas listened for the cellos beneath the brighter sounds. He entered on time and held the final note steadily. The inconvenient room had not helped them practice volume, but it had taught them to listen.

150. What change does Ms. Bell make to the seating arrangement?

- A) She separates the clarinets completely.
- B) She places the chairs in a circle.
- C) She moves the orchestra onto a stage.
- D) She puts the cellos outside the room.

151. Which statement best expresses the central idea of “A Different Rehearsal”?

- A) An imperfect rehearsal space helps musicians notice how their parts connect.
- B) Quiet rooms prevent orchestras from improving.
- C) Tomas decides to stop playing the clarinet.
- D) The auditorium is unavailable permanently.

152. Why does Ms. Bell add the sections back one at a time?

- A) To choose which musicians should leave
- B) To make the piece sound louder
- C) To help players hear how each section contributes
- D) To shorten the entire rehearsal

153. The contrast between the two rooms emphasizes the difference between ____.

- A) public concerts and private lessons
- B) powerful sound and careful listening
- C) old music and new music
- D) string instruments and wind instruments

154. Which choice best summarizes Tomas’s experience?

- A) A disappointing change leads him to listen more closely and perform more steadily.
- B) He misses rehearsal and studies the score alone.
- C) He changes instruments because the room is quiet.
- D) He persuades the orchestra to abandon the auditorium.

Informational Passage: Why Some Cities Map Shade

On a hot day, two sidewalks in the same neighborhood can feel very different. One may lie beneath mature trees or building awnings, while another receives direct sunlight for hours. To understand these differences, some cities create shade maps.

Researchers may combine satellite images, measurements taken at street level, and computer models that estimate how shadows move as the sun changes position. A useful map must also account for time. A bus stop shaded in the morning may be fully exposed during the afternoon commute.

Shade maps can help planners decide where to plant trees, place shelters, or create safer walking routes during extreme heat. However, the maps do not make those decisions automatically. A proposed tree may interfere with underground pipes, and a shelter must fit on the sidewalk without blocking access. Planners also need information about where people travel and which residents face the greatest heat risk.

For these reasons, shade data works best as one layer in a broader planning process. It reveals patterns that are difficult to notice from a single visit, but local knowledge and practical constraints are still necessary.

155. Why must a shade map account for time?

- A) Satellite images are available only at night.
- B) Shadows move as the sun changes position.
- C) Trees grow several feet each afternoon.
- D) Sidewalks close at the same hour daily.

156. What is the author’s main purpose?

- A) To argue that awnings should replace every tree
- B) To describe one person’s walk through a city
- C) To prove computer models never make errors
- D) To explain how shade maps are created and used within broader planning

157. Why is travel information useful alongside shade data?

- A) It determines the exact height of every building.
- B) It prevents shadows from changing.
- C) It helps planners focus improvements where people actually need protection.
- D) It identifies underground pipes without inspection.

158. As used in the last paragraph, layer most nearly means ____.

- A) one type of information among several
- B) a coating of pavement
- C) a level of government
- D) a row of trees

159. How is the passage organized?

- A) It compares two cities and declares a winner.
- B) It lists tree species in alphabetical order.
- C) It presents a problem but offers no applications.
- D) It introduces uneven shade, explains mapping methods, then discusses uses and limitations.

Literary Passage: The Borrowed Bell

Nora found the brass bicycle bell in a box of spare parts at the neighborhood repair shop. Its surface was scratched, but its ring was bright and clear. She wanted it for the used bicycle she was restoring for the spring parade. Mr. Chen, the shop owner, let her borrow it while she searched for one of her own.

For two weeks, Nora polished the bicycle, adjusted the brakes, and practiced riding slowly beside younger cyclists. The borrowed bell seemed to complete the project. Then, the afternoon before the parade, a boy entered the shop holding a faded photograph. He explained that the bell had belonged to his grandfather and had been donated accidentally with several tools.

Nora's hand rested on the bicycle handle. Without the bell, the bicycle would look unfinished. Still, she loosened the small clamp and handed it over. The boy rang it once and smiled at the familiar sound.

Mr. Chen offered Nora a plain new bell from beneath the counter. She attached it that evening. During the parade, its tone was not as musical, but each time she rang it to warn a walker, Nora remembered that restoring something could mean returning it, not merely making it shine.

160. Why does Nora originally want the brass bell?

- A) To sell it to the boy
- B) To replace the shop's doorbell
- C) To complete the bicycle she is restoring for a parade
- D) To enter a musical contest

161. What most strongly motivates Nora to return the bell?

- A) She dislikes its scratched surface.
- B) She recognizes its personal importance to the boy.
- C) Mr. Chen demands payment.
- D) The bicycle cannot hold a bell.

162. As used in the final paragraph, plain most nearly means ____.

- A) simple and undecorated
- B) easy to understand
- C) unattractive in every way
- D) completely silent

163. The contrast between the two bells mainly highlights ____.

- A) the dangers of riding in a parade
- B) Mr. Chen's inability to repair bicycles
- C) the difference between brass and steel
- D) Nora's changed understanding of what gives an object value

164. Which statement gives the best summary of Nora's experience?

- A) Nora wins a parade by finding a rare bell.
- B) A shop owner refuses to lend repair tools.
- C) Nora returns a prized borrowed part and gains a broader view of restoration.
- D) A boy teaches Nora how to ride a bicycle.

Scientific Passage: Seeds That Wait for Smoke

In regions where wildfires occur naturally, some plants produce seeds that can remain inactive in the soil for years. Heat alone awakens certain seeds, but others respond to chemicals carried in smoke. This response helps new plants emerge after a fire has opened space and released nutrients.

Scientists study the process by exposing seeds to smoke-infused water. The water contains dissolved compounds from smoke but does not expose the seeds to flames. Researchers can compare treated seeds with untreated ones and record how many germinate. Such experiments have identified a family of compounds called karrikins that can trigger germination in several species.

A response to smoke is not useful in every habitat. Where fire is extremely rare, waiting for smoke could prevent a seed from sprouting when ordinary conditions are favorable. Even in fire-prone landscapes, different species rely on different cues, including seasonal temperature changes or physical damage to a hard seed coat.

Understanding these cues can assist restoration projects. Workers may improve germination by treating selected native seeds before planting them. However, they must match the treatment to the species and local environment; smoke water is a tool, not a universal recipe.

165. How do researchers expose seeds to smoke compounds without using flames?

- A) They bury them beneath ash for years.
- B) They soak or treat them with smoke-infused water.
- C) They heat them until their coats crack.
- D) They plant them only during fires.

166. Why can responding to smoke benefit a plant in a fire-prone region?

- A) Fire may create space and nutrients favorable for growth.
- B) Smoke guarantees that rainfall will begin.
- C) Fire removes every competing seed permanently.
- D) Karrikins protect leaves from insects.

167. As used in the last paragraph, match most nearly means ____.

- A) make identical in appearance
- B) compete against
- C) ignite at the same time as
- D) select appropriately for

168. Which statement best expresses the passage's main idea?

- A) All seeds require wildfire before germinating.
- B) Smoke water is more dangerous than fire.
- C) Smoke can trigger some seeds, but effective use requires attention to species and habitat.
- D) Restoration workers should avoid native plants.

169. How does the author develop the topic?

- A) By narrating one seed's journey in chronological order
- B) By explaining a natural response, describing research, and qualifying its practical use
- C) By comparing two scientists' opposing careers
- D) By listing instructions for starting a wildfire

Biographical-Style Passage: The Notes in the Margin

As a young museum assistant, Elena Ruiz spent many afternoons cataloging letters written by travelers a century earlier. The official records listed dates, destinations, and donors, but Ruiz became interested in smaller marks: hurried corrections, sketches along the edges, and unfamiliar names added in pencil. She began keeping a separate index of these details. At first, the index seemed too minor for an exhibition. Then Ruiz noticed the same name in letters from three different collections. Further research showed that the woman named there had translated conversations and arranged transportation for several expeditions, although published accounts barely mentioned her. Ruiz did not claim that every mark would lead to a major discovery. Many remained unexplained. Still, she persuaded the museum to include high-resolution images of entire pages in its digital archive, rather than displaying typed transcripts alone. This allowed other researchers to examine handwriting, placement, and revisions. Years later, Ruiz directed the archive. She often reminded new assistants that cataloging required both accuracy and curiosity. A record should help people locate what is already known, she explained, but it should also preserve the clues that may change what people know next.

170. What detail first leads Ruiz to conduct further research?

- A) The same unfamiliar name appears in three collections.
- B) A donor requests a new exhibition.
- C) Several typed transcripts contain errors.
- D) A traveler's sketch shows the museum.

171. Why does Ruiz favor images of entire pages over transcripts alone?

- A) Images require no cataloging information.
- B) Transcripts always change the writers' words.
- C) Visitors cannot read typed text online.
- D) Page images preserve visual clues that typed words may omit.

172. As used in the final paragraph, preserve most nearly means ____.

- A) explain completely
- B) keep available and intact
- C) arrange alphabetically
- D) hide securely

173. The repeated attention to small marks in the margins emphasizes ____.

- A) the poor condition of every museum letter
- B) Ruiz's preference for drawing over reading
- C) the potential importance of details that seem minor
- D) the travelers' lack of writing ability

174. What central idea does the passage convey?

- A) Museums should display only handwritten letters.
- B) Every unexplained name belongs to a famous person.
- C) Accuracy and curiosity cannot be used together.
- D) Careful records should support present knowledge while leaving room for future discovery.

Section 4: Mathematics

64 questions | Recommended time: 45 minutes

175. What is the value of $6 + 24 \div 3 - 5$?

- A) 5
- B) 7
- C) 9
- D) 13

176. Which decimal is equivalent to $7/20$?

- A) 0.35
- B) 0.28
- C) 0.40
- D) 0.70

177. What is the value of 0.004×10^3 ?

- A) 0.004
- B) 0.04
- C) 0.4
- D) 4

178. Which value is equal to $2^3 \times 3^2$?

- A) 36
- B) 72
- C) 144
- D) 216

179. Evaluate $3r - 2s^2$ when $r = 6$ and $s = 2$.

- A) 8
- B) 12
- C) 10
- D) 28

180. Solve $5(2x + 1) = 3x + 26$.

- A) 2
- B) 3
- C) 4
- D) 5

181. A streaming service charges \$9 per month plus a one-time \$15 setup fee. Which expression gives the first-year cost for m months of use?

- A) $9m + 15$
- B) $15m + 9$
- C) $24m$
- D) $9(m + 15)$

182. A map scale states that 4 centimeters represents 30 kilometers. How many kilometers does 10 centimeters represent?

- A) 60
- B) 70
- C) 80
- D) 75

183. Two angles form a linear pair. One measures 128° . What is the other angle?

- A) 42°
- B) 52°
- C) 62°
- D) 232°

184. A rectangle has perimeter 34 centimeters and length 10 centimeters. What is its width?

- A) 5 centimeters
- B) 6 centimeters
- C) 14 centimeters
- D) 7 centimeters

185. Point $(3, -4)$ is reflected across the y-axis. What are the coordinates of its image?

- A) $(3, 4)$
- B) $(-4, 3)$
- C) $(-3, -4)$
- D) $(-3, 4)$

186. A container holds 3 quarts and 2 cups of liquid. How many cups does it hold altogether?

- A) 14 cups
- B) 12 cups
- C) 10 cups
- D) 8 cups

187. The morning temperature is -4°C . By afternoon, it rises 11 degrees. What is the afternoon temperature?

- A) -15°C
- B) -7°C
- C) 7°C
- D) 15°C

188. A data set contains three 4s, two 7s, and one 10. What is the mean?

- A) 6
- B) 7
- C) 8
- D) 9

189. A box contains 2 orange, 5 purple, and 3 white cards. What is the probability of drawing a card that is not purple?

- A) $\frac{1}{5}$
- B) $\frac{1}{2}$
- C) $\frac{3}{5}$
- D) $\frac{4}{5}$

190. The data set is 4, 7, 7, 9, 13, 15. Which statement is true?

- A) The range is 9.
- B) The mean is 9.
- C) The mode is 9.
- D) The median is 8.

191. What is $4\frac{2}{5} - 1\frac{3}{10}$?

- A) $2\frac{9}{10}$
- B) $3\frac{1}{10}$
- C) $3\frac{3}{10}$
- D) $3\frac{7}{10}$

192. What is $|-8| + (-13)$?

- A) 5
- B) -21
- C) -5
- D) 21

193. A \$72 item is discounted 25%. What is the sale price?

- A) \$18
- B) \$47
- C) \$57
- D) \$54

194. Simplify $4(3x - 2) + 5$.

- A) $12x - 3$
- B) $12x + 3$
- C) $7x - 2$
- D) $12x - 7$

195. Solve $6 - \frac{x}{3} = 2$.

- A) 4
- B) 12
- C) 8
- D) 24

196. If $h(n) = 2n^2 + 1$, what is $h(3)$?

- A) 13
- B) 18
- C) 19
- D) 37

197. A tank contains 80 liters and drains 6 liters per minute. Which expression gives the liters remaining after t minutes?

- A) $74t$
- B) $80 + 6t$
- C) $6t - 80$
- D) $80 - 6t$

198. A regular decagon has a perimeter of 90 centimeters. What is one side length?

- A) 9 centimeters
- B) 8 centimeters
- C) 10 centimeters
- D) 18 centimeters

199. A circle has diameter 18 inches. What is its circumference?

- A) 9π inches
- B) 18π inches
- C) 36π inches
- D) 81π inches

200. A triangle has vertices $(0,0)$, $(0,6)$, and $(4,0)$. What is its area?

- A) 10 square units
- B) 20 square units
- C) 12 square units
- D) 24 square units

201. How many centimeters are in 3.4 meters?

- A) 34
- B) 3,400
- C) 0.34
- D) 340

202. A runner completes 7.5 kilometers in 50 minutes. At the same rate, how far in 2 hours?

- A) 18 kilometers
- B) 15 kilometers
- C) 16 kilometers
- D) 20 kilometers

203. A recipe needs 10 ounces per loaf. How many pounds are needed for 8 loaves?

- A) 4 pounds
- B) 5 pounds
- C) 6 pounds
- D) 8 pounds

204. The values are 2, 5, 8, 11, and 14. What is the mean?

- A) 7
- B) 9
- C) 8
- D) 10

205. A fair spinner has 5 equal sectors. What is the probability of landing on the same sector twice?

- A) $\frac{1}{10}$
- B) $\frac{1}{25}$
- C) $\frac{2}{5}$
- D) $\frac{1}{5}$

206. Set P has range 8. Adding a new maximum 5 greater than the old maximum changes the range to what value?

- A) 13
- B) 8
- C) 10
- D) 40

207. What is $\frac{7}{8} \div \frac{1}{4}$?

- A) $2\frac{1}{8}$
- B) 3
- C) $3\frac{1}{2}$
- D) $4\frac{1}{2}$

208. Which of these integers is prime?

- A) 47
- B) 39
- C) 51
- D) 57

209. Evaluate $6 + 18 \div 3 \times 2 - 5$.

- A) 7
- B) 17
- C) 19
- D) 13

210. A class has 18 girls and 12 boys. What fraction of the class is boys in simplest form?

- A) $\frac{1}{3}$
- B) $\frac{2}{5}$
- C) $\frac{3}{5}$
- D) $\frac{2}{3}$

211. Solve $3(x - 4) = 2x + 5$.

- A) 9
- B) 13
- C) 17
- D) 21

212. Which inequality represents “seven less than twice n is at most 19”?

- A) $2n - 7 \leq 19$
- B) $2(n - 7) < 19$
- C) $7 - 2n \geq 19$
- D) $2n + 7 \leq 19$

213. The points (1, 6), (2, 10), and (3, 14) follow a linear rule. What is y when x = 5?

- A) 18
- B) 20
- C) 24
- D) 22

214. A theater charges \$9 per ticket plus one \$6 service fee per order. Which equation finds tickets t when the total is \$60?

- A) $6t + 9 = 60$
- B) $9t + 6 = 60$
- C) $9(t + 6) = 60$
- D) $15t = 60$

215. Two supplementary angles have measures $(3x + 10)^\circ$ and $(5x + 18)^\circ$. What is x?

- A) 16
- B) 18
- C) 19
- D) 20

216. A right triangle has legs 8 and 15. What is its hypotenuse?

- A) 17
- B) 16
- C) 19
- D) 23

217. A rectangular prism measures 4 by 5 by 9. What is its surface area?

- A) 180 square units
- B) 190 square units
- C) 220 square units
- D) 202 square units

218. A scale drawing uses 1 inch for 6 feet. A wall appears 4.5 inches long. How long is the wall?

- A) 21 feet
- B) 27 feet
- C) 24 feet
- D) 30 feet

219. A bus departs at 10:47 a.m. and arrives at 1:23 p.m. How long is the trip?

- A) 2 hours 24 minutes
- B) 2 hours 46 minutes
- C) 2 hours 36 minutes
- D) 3 hours 36 minutes

220. The median of 4, 7, 9, x, and 18 is 9. Which value could x be?

- A) 12
- B) 2
- C) 6
- D) 8

221. A bag contains 3 red, 4 blue, and 5 green tiles. What is the probability of drawing a tile that is not green?

- A) $\frac{5}{12}$
- B) $\frac{1}{2}$
- C) $\frac{3}{4}$
- D) $\frac{7}{12}$

222. A survey records 12 yes votes and 8 no votes. After more votes, yes represents 60% of 30 total votes. How many of the new votes were yes?

- A) 4
- B) 6
- C) 8
- D) 10

223. A tank is $\frac{3}{5}$ full. After 18 gallons are added, it is $\frac{9}{10}$ full. What is the tank's capacity?

- A) 45 gallons
- B) 54 gallons
- C) 72 gallons
- D) 60 gallons

224. Which expression has a value closest to 50?

- A) 4.8×8.2
- B) 6.2×8.1
- C) 7.4×8.0
- D) 9.1×6.2

225. If $a:b = 4:7$ and $b:c = 14:15$, what is $a:c$?

- A) 8:15
- B) 4:15
- C) 7:15
- D) 8:21

226. Simplify $4(2x - 3) - 5(x + 1)$.

- A) $3x - 8$
- B) $13x - 17$
- C) $3x - 17$
- D) $3x + 2$

227. For $f(n) = n^2 - 2n$, what is $f(-3)$?

- A) 3
- B) 9
- C) 21
- D) 15

228. A cyclist rides 12 miles at one speed and 18 miles at a speed 3 miles per hour faster. Which expression represents the total riding time if the first speed is r ?

- A) $30/(2r + 3)$
- B) $12/r + 18/(r + 3)$
- C) $12r + 18(r + 3)$
- D) $12/(r + 3) + 18/r$

229. The perimeter of a rectangle is 54. Its length is 3 more than twice its width. What is the width?

- A) 8
- B) 6
- C) 9
- D) 12

230. A regular polygon has each exterior angle measuring 45° . How many sides does it have?

- A) 6
- B) 9
- C) 8
- D) 12

231. A circle has circumference 31.4 units. Using 3.14 for π , what is its area?

- A) 25 square units
- B) 62.8 square units
- C) 157 square units
- D) 78.5 square units

232. Triangle ABC is similar to triangle DEF. $AB = 6$, $DE = 9$, and $BC = 10$. What is EF?

- A) 12
- B) 15
- C) 13.5
- D) 18

233. A 5-pound bag of rice is divided equally into 8 containers. How many ounces go in each container?

- A) 10 ounces
- B) 8 ounces
- C) 12 ounces
- D) 16 ounces

234. A car travels 156 miles using 6 gallons of fuel. At the same rate, how far will it travel using 8.5 gallons?

- A) 204 miles
- B) 214.5 miles
- C) 221 miles
- D) 234 miles

235. A rectangular floor measures 4.2 meters by 3.5 meters. Tiles cover 0.35 square meter each. How many tiles are needed?

- A) 21
- B) 35
- C) 49
- D) 42

236. The mean of five scores is 84. Four scores are 79, 82, 86, and 88. What is the fifth score?

- A) 83
- B) 85
- C) 84
- D) 87

237. A spinner has equal sections numbered 1 through 6. It is spun twice. What is the probability that both results are even?

- A) $\frac{1}{4}$
- B) $\frac{1}{6}$
- C) $\frac{1}{3}$
- D) $\frac{1}{2}$

238. Data set A has values 4, 6, 8, 10. Data set B is formed by adding 5 to each value. How do the mean and range change?

- A) Both increase by 5.
- B) The mean stays the same, and the range increases by 5.
- C) The mean increases by 5, and the range stays the same.
- D) Both stay the same.

Section 5: Language

60 questions | Recommended time: 30 minutes

239. Which version of the rehearsal sentence is punctuated correctly?

- A) During the long rehearsal the actors, remained focused.
- B) During, the long rehearsal the actors remained focused.
- C) During the long rehearsal the actors remained, focused.
- D) During the long rehearsal, the actors remained focused.

240. Which version correctly shows that the tires belong to one bicycle?

- A) The bicycle's tires needed air.
- B) The bicycles tires needed air.
- C) The bicycles' tires needed air.
- D) The bicycles's tires needed air.

241. Which version correctly introduces the list of packed items?

- A) Nora packed four things; gloves, boots, a scarf, and a hat.
- B) Nora packed four things, gloves, boots, a scarf, and a hat.
- C) Nora packed four things: gloves, boots, a scarf, and a hat.
- D) Nora packed: four things gloves, boots, a scarf, and a hat.

242. Which version correctly capitalizes the park name and month?

- A) We toured Yellowstone national Park in August.
- B) We toured yellowstone National Park in August.
- C) We toured Yellowstone National park in august.
- D) We toured Yellowstone National Park in August.

243. Which version correctly capitalizes the title, name, language, and day?

- A) Captain Rosa Vega speaks French on Thursdays.
- B) captain Rosa Vega speaks french on Thursdays.
- C) Captain rosa Vega speaks French on thursdays.
- D) Captain Rosa vega speaks french on Thursdays.

244. Which spelling is standard US English?

- A) accommodate
- B) acommodate
- C) accomodate
- D) accomadate

245. Which option contains a spelling error?

- A) The hallway was unusually quiet.
- B) The shelves were nearly identicle.
- C) We appreciated her honest response.
- D) The mechanic examined the engine.

246. Which collection sentence follows standard subject-verb agreement?

- A) The collection of stamps are valuable.
- B) The collection of stamps is valuable.
- C) The collection of stamp are valuable.
- D) The collection of stamps have value are.

247. Which version uses the correct subject pronoun?

- A) Her and Mateo organized the files.
- B) Mateo and her organized the files.
- C) She and Mateo organized the files.
- D) Mateo and herself organized the files.

248. Which verb phrase correctly completes the sentence? Before the alarm sounded, the guard ____ the door.

- A) checks
- B) will check
- C) checking
- D) had checked

249. Which word correctly completes the sentence? Please ____ the folders on the desk.

- A) lie
- B) lay
- C) lain
- D) lying

250. Which sentence is clearest and most concise?

- A) The reason is because the road was closed.
- B) Due to the fact that the road was closed, we stopped.
- C) We stopped because the road was closed.
- D) We stopped for the reason that the road had a closure.

Editing Passage: A Seed-Swap Shelf

(1) The public library could create a seed-swap shelf for local gardeners. (2) People would leave labeled packets of extra vegetable, flower, or herb seeds. - A) The gate opened, the crowd entered.
- B) The gate opened: and the crowd entered.
- C) The gate opened the crowd entered.
- D) The gate opened; the crowd entered.

255. Which version correctly punctuates the quotation?

- A) "Please close the window," said Ravi.
- B) "Please close the window" said Ravi.
- C) "Please close the window", said Ravi.
- D) Please "close the window," said Ravi.

256. Which version is capitalized correctly?

- A) We crossed the rocky Mountains in June.
- B) We crossed the Rocky Mountains in June.
- C) We crossed the Rocky mountains in june.
- D) We crossed The Rocky Mountains in June.

257. Which version is capitalized correctly?

- A) senator Kim spoke at Central High school.
- B) Senator kim spoke at central High School.
- C) Senator Kim spoke at Central High School.
- D) Senator Kim spoke at Central high school.

258. Which spelling is correct?

- A) independant
- B) indepedent
- C) independint
- D) independent

259. Which sentence contains a spelling error?

- A) The room had a pleasent aroma.
- B) The response was accurate.
- C) The schedule was flexible.
- D) The bridge remained accessible.

260. Which word correctly completes the sentence? The two accounts had many ____.

- A) similarities
- B) similarities
- C) similaritys
- D) similareties

261. Which sentence follows standard subject-verb agreement?

- A) A list of names appear on the screen.
- B) A list of name appear on the screen.
- C) A list of names appears on the screen.
- D) A list of names appearing on the screen.

262. Which sentence uses parallel structure?

- A) The job requires measuring, to cut, and assembly.
- B) The job requires to measure, cutting, and to assemble.
- C) The job requires measurement, cutting, and to assemble.
- D) The job requires measuring, cutting, and assembling.

263. Which option contains a complete subject and predicate?

- A) The lantern flickered during the storm.
- B) Because the lantern flickered.
- C) Flickering during the storm.
- D) The lantern near the window.

264. Which word correctly completes the sentence? The blue scarf is ____.

- A) their
- B) theirs
- C) there's
- D) there

265. Which transition fits the contrast? The first route was longer; ____, it was safer.

- A) therefore
- B) for example
- C) however
- D) similarly

Editing Passage: A Community Tool Guide

(1) Our town should create an online guide to tools residents can borrow. (2) The guide could list equipment available at the library, community center, and neighborhood workshop. (3) Each entry would explain where the item is stored, when it may be borrowed, and whether training is required. (6) A clear guide would help more people use shared resources efficiently.

266. Which title best represents the paragraph?

- A) Repairs to the Town Fountain
- B) Training for One Workshop
- C) Why Tools Become Damaged
- D) Finding Shared Tools Online

267. Which revision would make sentence 1 the strongest topic sentence?

- A) An online borrowing guide would help residents locate shared tools across town.
- B) Our town has several public buildings.
- C) Many residents use the internet every day.
- D) Tools can complete many household tasks.

268. Which sentence would provide the most effective conclusion?

- A) The website might use several colors.
- B) With reliable information in one place, residents could borrow equipment more easily and avoid unnecessary trips.
- C) Some equipment requires training before use.
- D) Town residents own many personal tools.

269. Which sentence correctly punctuates an introductory phrase?

- A) After the final bell, the hallway became quiet.
- B) After the final bell the hallway, became quiet.
- C) After, the final bell the hallway became quiet.
- D) After the final bell the hallway became, quiet.

270. Which sentence uses a colon correctly?

- A) Bring: these supplies, paper, tape, and scissors.
- B) Bring these: supplies paper, tape, and scissors.
- C) Bring these supplies: paper, tape, and scissors.
- D) Bring these supplies paper: tape, and scissors.

271. Which option correctly shows plural possession?

- A) The two captain's uniforms were ready.
- B) The two captains' uniforms were ready.
- C) The two captains uniforms' were ready.
- D) The two captains's uniforms were ready.

272. Which sentence follows standard capitalization?

- A) We study french on Tuesdays.
- B) We study French on tuesdays.
- C) We Study French on Tuesdays.
- D) We study French on Tuesdays.

273. Select the correctly capitalized sentence.

- A) My aunt visited Lake Superior during spring break.
- B) My Aunt visited lake Superior during Spring Break.
- C) My aunt visited Lake superior during Spring break.
- D) My Aunt visited Lake Superior during spring break.

274. Which option spells the word correctly?

- A) neccessary
- B) necessary
- C) necessary
- D) nessessary

275. Which sentence contains no spelling errors?

- A) The committee recommended a separate entrance.
- B) The committee recommended a separate entrance.
- C) The committee reccommended a seperate entrance.
- D) The comittee recommended a seperete entrance.

276. Which sentence uses the correct pronoun case?

- A) The coach spoke to Elena and I.
- B) The coach spoke to she and me.
- C) The coach spoke to Elena and myself.
- D) The coach spoke to Elena and me.

277. Which sentence places the modifier clearly?

- A) Wearing a reflective vest, the cyclist crossed the bridge.
- B) Wearing a reflective vest, the bridge was crossed by the cyclist.
- C) The cyclist crossed, wearing a reflective vest, the bridge.
- D) The bridge wearing a reflective vest was crossed by the cyclist.

- A) Jamal opens the box and removed the label.
- B) Jamal had opened the box and removes the label.
- C) Jamal opened the box and removed the label.
- D) Jamal opening the box and removed the label.

279. Which sentence uses the most precise word?

- A) The hawk did something above the field.
- B) The hawk circled above the field.
- C) The hawk went around somewhere.
- D) The hawk was being up over the field.

280. Which revision is most concise?

- A) Due to the fact that it rained, the meeting was postponed.
- B) The meeting was postponed on account of the fact of rain.
- C) Rain was the reason why the meeting was postponed later.
- D) The meeting was postponed because of rain.

281. Which word correctly completes the sentence? The new rule may ____ attendance.

- A) affect
- B) effect
- C) affects
- D) effects

Editing Passage: A Quieter Lunchroom

(1) Our school tested a quieter lunch period last month. (2) Staff placed soft pads beneath chair legs and opened two serving lines instead of one. (3) Students spent less time waiting, so fewer people crowded around the tables at once. (4) The art club is planning a mural for the east hallway. (5) Teachers reported that conversations were easier to hear without becoming louder. (6) Keeping the pads and the second serving line would make lunchtime calmer without changing the schedule.

282. To improve paragraph unity, which numbered sentence should be deleted?

- A) Sentence 2
- B) Sentence 4
- C) Sentence 3
- D) Sentence 5

283. Where would this sentence fit best? “Together, these small changes reduced both noise and congestion.”

- A) Before sentence 1
- B) After sentence 2
- C) After sentence 5
- D) After sentence 6

284. Which sentence correctly punctuates a compound sentence?

- A) The clouds gathered but, the game continued.
- B) The clouds, gathered but the game continued.
- C) The clouds gathered, but the game continued.
- D) The clouds gathered but the game, continued.

285. Which sentence correctly punctuates Maya’s exact words?

- A) “Please close the gate,” Maya said.
- B) “Please close the gate”, Maya said.
- C) “Please close the gate” Maya, said.
- D) Please “close the gate,” Maya said.

286. Which version correctly capitalizes the professor’s title, subject, and university?

- A) professor Ahmed teaches History at Westlake University.
- B) Professor Ahmed teaches history at Westlake university.
- C) Professor ahmed teaches History at Westlake University.
- D) Professor Ahmed teaches history at Westlake University.

287. Which version correctly capitalizes the museum name and month?

- A) Our Class visited the National air and space museum in July.
- B) Our class visited the National Air and Space Museum in July.
- C) Our class visited the national Air and Space Museum in july.
- D) Our class visited the National Air and Space Museum in july.

288. Choose the standard spelling of the word meaning “to provide room for.”

- A) accomodate
- B) accomodate
- C) accommodate
- D) accommadate

289. Which version spells every word in the performance sentence correctly?

- A) The audience applauded the remarkable performance.
- B) The audience aplauded the remarkable performance.
- C) The audiance applauded the remarkible performance.
- D) The audience applauded the remarkable performance.

290. Which word is misspelled?

- A) maintenance
- B) convenient
- C) independent
- D) priviledge

291. Which sentence has correct subject-verb agreement?

- A) Neither the coaches nor the captain are available.
- B) Neither the coaches nor the captain is available.
- C) Neither the coaches or the captain is available.
- D) Neither the coaches nor the captain be available.

292. Which option is a complete sentence rather than a fragment?

- A) Although the trail was steep.
- B) Because we reached the overlook.
- C) Although the trail was steep, we reached the overlook.
- D) The steep trail near the overlook.

293. Which job-description sentence maintains parallel structure?

- A) The job requires sorting files, answering calls, and greeting visitors.
- B) The job requires sorting files, to answer calls, and greeting visitors.
- C) The job requires files to be sorted, answering calls, and to greet visitors.
- D) The job requires sorting files, calls are answered, and greeting visitors.

294. Which word correctly completes the sentence? Everyone ____ Theo submitted the form.

- A) accept
- B) expect
- C) excerpt
- D) except

295. Which transition best completes the sentence? The first route is shorter; ____, the second avoids heavy traffic.

- A) therefore
- B) however
- C) for example
- D) similarly

296. Which revision makes the pronoun reference clearest?

- A) When Ava spoke with Priya, she was carrying it.
- B) When she spoke with Priya, Ava was carrying it.
- C) When Ava spoke with Priya, Ava was carrying the folder.
- D) Speaking with her, she carried the folder.

Editing Passage: A Community Tool Shelf

(1) Our apartment building recently created a shelf where residents can borrow simple tools. (2) Before the shelf existed, people often bought items such as a wrench or level for a single repair. Detailed Explanations

Verbal Skills

1. HSPT-V2-001 - Answer B: sensible

Prudent means showing careful judgment, so sensible is the closest synonym.

2. HSPT-V2-002 - Answer A: begin

To commence an activity is to begin it.

3. HSPT-V2-003 - Answer C: apparent

Evident means clearly seen or understood, which is apparent.

4. HSPT-V2-004 - Answer D: pessimistic

Optimistic means expecting favorable results, while pessimistic means expecting unfavorable results.

5. HSPT-V2-005 - Answer A: forbid

Permit means allow, while forbid means refuse to allow.

6. HSPT-V2-006 - Answer C: deep

Shallow describes little depth, and deep is its direct opposite.

7. HSPT-V2-007 - Answer A: observe

A keyboard is used to type, while a telescope is used to observe.

8. HSPT-V2-008 - Answer B: courtroom

A chef works in a restaurant, just as a judge works in a courtroom.

9. HSPT-V2-009 - Answer D: wood

Flour is produced from wheat, while paper is produced from wood.

10. HSPT-V2-010 - Answer C: kilogram

Gallon, liter, and quart measure capacity; kilogram measures mass.

11. HSPT-V2-011 - Answer B: candid

Honest, truthful, sincere, and candid all describe openness and truthfulness.

12. HSPT-V2-012 - Answer C: They are months.

January, April, and October are all months of the year.

13. HSPT-V2-013 - Answer D: triangle

Star comes before circle, and triangle follows circle, so triangle must be last.

14. HSPT-V2-014 - Answer A: Key R is not copper.

Every copper key opens P; since R does not, it cannot be copper.

15. HSPT-V2-015 - Answer B: Thursday

Mira rules out Tuesday and Leo's absence rules out Saturday, leaving Thursday.

16. HSPT-V2-016 - Answer B: careful

Meticulous means extremely careful about details.

17. HSPT-V2-017 - Answer C: neighboring

Adjacent things are next to or neighboring each other.

18. HSPT-V2-018 - Answer D: repay

To compensate is to repay someone for work or loss.

19. HSPT-V2-019 - Answer A: friendly

Hostile means unfriendly; friendly is its opposite.

20. HSPT-V2-020 - Answer B: minimum

Maximum is the greatest amount; minimum is the least.

21. HSPT-V2-021 - Answer C: descend

Ascend means move upward, while descend means move downward.

22. HSPT-V2-022 - Answer D: bear

A nest shelters a bird, while a den shelters a bear.

23. HSPT-V2-023 - Answer A: hedge

Editing improves a manuscript; pruning improves a hedge.

24. HSPT-V2-024 - Answer B: meter
A minute is a smaller unit within an hour, as a centimeter is within a meter.
25. HSPT-V2-025 - Answer C: opaque
The other words describe materials that transmit at least some light.
26. HSPT-V2-026 - Answer D: barge
All four are types of watercraft.
27. HSPT-V2-027 - Answer A: metals
Copper, gold, and aluminum are metals.
28. HSPT-V2-028 - Answer B: Arun
Bella cannot lead because that would require Chen to record, so Arun leads.
29. HSPT-V2-029 - Answer C: No blue card is blank.
Blue cards are numbered, and numbered cards cannot be blank.
30. HSPT-V2-030 - Answer D: W
The forced order is Z, W, X, Y.
31. HSPT-V2-031 - Answer A: striking
Vivid means strikingly clear, bright, or detailed.
32. HSPT-V2-032 - Answer C: limited
Scarce means available only in a limited amount.
33. HSPT-V2-033 - Answer D: assign
To allocate is to assign something for a particular purpose.
34. HSPT-V2-034 - Answer B: horizontal
Vertical runs up and down; horizontal runs from side to side.
35. HSPT-V2-035 - Answer D: accidental
Deliberate means intentional; accidental means unintentional.
36. HSPT-V2-036 - Answer A: optional
Compulsory means required; optional means left to choice.
37. HSPT-V2-037 - Answer C: engine
A battery supplies a flashlight with energy; fuel supplies an engine with energy.
38. HSPT-V2-038 - Answer B: butterfly
A bud develops into a flower, as an egg develops into a butterfly.
39. HSPT-V2-039 - Answer A: direction
A thermometer indicates temperature; a compass indicates direction.
40. HSPT-V2-040 - Answer C: harbor
The other choices are landforms; a harbor is a sheltered body of water.
41. HSPT-V2-041 - Answer D: bass
Soprano, alto, tenor, and bass are vocal ranges.
42. HSPT-V2-042 - Answer C: quadrilaterals
Each figure is a polygon with four sides.
43. HSPT-V2-043 - Answer A: art
Coding is taken by Owen and drama by Mira, leaving art for Paz.
44. HSPT-V2-044 - Answer B: The alarm is not armed.
The stated rule means an armed alarm and an opened door would produce a bell.
45. HSPT-V2-045 - Answer D: M
The constraints force M before J before K before L before N.
46. HSPT-V2-046 - Answer B: unbiased
Impartial means fair and not favoring one side.
47. HSPT-V2-047 - Answer C: plentiful
Abundant means existing in a plentiful amount.
48. HSPT-V2-048 - Answer A: unavoidable
Inevitable describes something certain to happen and therefore unavoidable.
49. HSPT-V2-049 - Answer D: modern
Ancient means very old; modern means belonging to recent times.

50. HSPT-V2-050 - Answer C: divided
A unanimous group agrees completely; a divided group does not.
51. HSPT-V2-051 - Answer B: exclude
Include means contain as part of a whole; exclude means leave out.
52. HSPT-V2-052 - Answer A: speech
An itinerary plans a journey; an outline plans a speech.
53. HSPT-V2-053 - Answer D: weight
An odometer measures distance, while a scale measures weight.
54. HSPT-V2-054 - Answer C: jar
A roof covers a house; a lid covers a jar.
55. HSPT-V2-055 - Answer B: lantern
The other choices are musical instruments; a lantern provides light.
56. HSPT-V2-056 - Answer A: tin
Copper, iron, silver, and tin are metals.
57. HSPT-V2-057 - Answer D: foal and horse
A calf is the young of a cow; a foal is the young of a horse.
58. HSPT-V2-058 - Answer C: Inez attends the safety meeting.
The general rule applies to every club member, including Inez.
59. HSPT-V2-059 - Answer D: L
The constraints produce the order L, J, K, M.
60. HSPT-V2-060 - Answer B: Some rulers are not glass.
Any flexible ruler cannot be glass, so at least some rulers are not glass.

Quantitative Skills

61. HSPT-Q2-001 - Answer C: 57

The increases are 3, 6, 9, and 12; the next is 15, so $42 + 15 = 57$.

62. HSPT-Q2-002 - Answer B: 1,250

Each term is multiplied by 5, so $250 \times 5 = 1,250$.

63. HSPT-Q2-003 - Answer A: 9

The sequence subtracts 3, 6, 9, and 12; subtracting 15 next gives 9.

64. HSPT-Q2-004 - Answer D: 74

The operations alternate $+3$ and $\times 2$; therefore $37 \times 2 = 74$.

65. HSPT-Q2-005 - Answer A: 20

The six positive factors of 20 are 1, 2, 4, 5, 10, and 20.

66. HSPT-Q2-006 - Answer B: \$35

Each notebook costs $\$14 \div 8 = \1.75 , and $20 \times \$1.75 = \35 .

67. HSPT-Q2-007 - Answer C: 63

Thirty percent of 90 is 27, so $90 - 27 = 63$.

68. HSPT-Q2-008 - Answer C: The two quantities are equal.

$7/9 + 1/6 = 14/18 + 3/18 = 17/18$.

69. HSPT-Q2-009 - Answer D: The relationship cannot be determined from the information given.

The relationship changes with p ; for example, $p = 0$ and $p = 10$ give different results.

70. HSPT-Q2-010 - Answer B: Quantity B is greater.

Quantity A is $12 + 3 = 15$, while Quantity B is 16.

71. HSPT-Q2-011 - Answer A: Quantity A is greater.

Each side is $45 \div 5 = 9$ units, which is greater than 8.

72. HSPT-Q2-012 - Answer B: Quantity B is greater.

Quantity A is 70° , while Quantity B is $50^\circ + 60^\circ = 110^\circ$.

73. HSPT-Q2-013 - Answer D: The relationship cannot be determined from the information given.

The volume is $10h$, so its relationship to 30 depends on the unspecified height h .

74. HSPT-Q2-014 - Answer C: 83

Differences increase by 5: 5, 10, 15, 20, then 25.

75. HSPT-Q2-015 - Answer D: 9

Each term is divided by 3.

76. HSPT-Q2-016 - Answer A: 720

Terms multiply successively by 2, 3, 4, 5, and 6.

77. HSPT-Q2-017 - Answer B: 28

Since 63 is 7 times 9, n is 7 times 4.

78. HSPT-Q2-018 - Answer C: 9

Multiplying 36 by 0.25 gives 9.

79. HSPT-Q2-019 - Answer D: 30

Thirty equals $4 \times 7 + 2$.

80. HSPT-Q2-020 - Answer B: 20%

The decrease is 30, and $30/150 = 20\%$.

81. HSPT-Q2-021 - Answer A: Quantity A is greater.

Quantity A is 54, so Quantity A is greater.

82. HSPT-Q2-022 - Answer C: The two quantities are equal.

Both quantities equal 15.

83. HSPT-Q2-023 - Answer D: The relationship cannot be determined from the information given.

The relationship changes with t .

84. HSPT-Q2-024 - Answer B: Quantity B is greater.

The perimeter is 24, so Quantity B is greater.

85. HSPT-Q2-025 - Answer A: Quantity A is greater.
The area is 35, so Quantity A is greater.
86. HSPT-Q2-026 - Answer C: The two quantities are equal.
A square's perimeter equals four times its side length.
87. HSPT-Q2-027 - Answer D: 49
The differences are 3, 6, 9, 12, then 15.
88. HSPT-Q2-028 - Answer B: 152
The operations alternate $\times 4$ and -2 .
89. HSPT-Q2-029 - Answer C: 16
Two interwoven sequences double: 2, 4, 8, 16 and 5, 10, 20.
90. HSPT-Q2-030 - Answer D: $1\frac{1}{2}$
Each term increases by $\frac{1}{4}$.
91. HSPT-Q2-031 - Answer C: 0.35×80
Thirty-five percent written as a decimal is 0.35.
92. HSPT-Q2-032 - Answer B: \$22.00
Each notebook costs \$2.75, and $8 \times \$2.75 = \22.00 .
93. HSPT-Q2-033 - Answer D: 24
The least common multiple of 6 and 8 is 24.
94. HSPT-Q2-034 - Answer A: Quantity A is greater.
Quantity A is 32 and Quantity B is 25.
95. HSPT-Q2-035 - Answer C: The two quantities are equal.
The middle value of the ordered list is 11.
96. HSPT-Q2-036 - Answer A: Quantity A is greater.
Squaring a positive number below 1 makes it smaller.
97. HSPT-Q2-037 - Answer D: The relationship cannot be determined from the information given.
Possible dimensions give different perimeters, so the relationship is undetermined.
98. HSPT-Q2-038 - Answer A: Quantity A is greater.
The third angle is 80° , which is greater than 75° .
99. HSPT-Q2-039 - Answer B: Quantity B is greater.
The volume is 27, while the surface area is 54.
100. HSPT-Q2-040 - Answer A: 12.75
The operations alternate $\div 2$ and $+2$; $25.5 \div 2 = 12.75$.
101. HSPT-Q2-041 - Answer D: 161
Each term is twice the preceding term minus 1.
102. HSPT-Q2-042 - Answer C: 125
The terms are consecutive cubes: 1^3 , 2^3 , 3^3 , 4^3 , and 5^3 .
103. HSPT-Q2-043 - Answer B: 48
The differences are 5, 7, 9, 11, then 13.
104. HSPT-Q2-044 - Answer A: \$43
A 20% discount leaves \$48; subtracting \$5 gives \$43.
105. HSPT-Q2-045 - Answer D: $\frac{5}{6}$
Five-sixths is about 0.833, greater than 0.8, 81%, and $\frac{4}{5}$.
106. HSPT-Q2-046 - Answer C: 47
Since $47 = 5 \times 9 + 2$, it has the required remainder.
107. HSPT-Q2-047 - Answer B: Quantity B is greater.
Quantity A is 5, while Quantity B is 6.
108. HSPT-Q2-048 - Answer A: Quantity A is greater.
The equation states that x is 2 greater than y .
109. HSPT-Q2-049 - Answer D: The relationship cannot be determined from the information given.
The sum does not determine which addend is larger.
110. HSPT-Q2-050 - Answer C: The two quantities are equal.
The square side plus 2 is 8, equal to the triangle side.

111. HSPT-Q2-051 - Answer A: Quantity A is greater.
The diameter is 14, which is greater than 12.
112. HSPT-Q2-052 - Answer B: Quantity B is greater.
The largest angle is 80° , less than 90° .

Reading Comprehension

113. HSPT-R2-001 - Answer B: Rain is expected, and the wall needs drying time.
The forecast and drying requirement make postponement impractical.
114. HSPT-R2-002 - Answer C: He values the unexpected result they created.
The children's positive response helps Eli appreciate the violet night sky.
115. HSPT-R2-003 - Answer A: positioned
Mina positioned the sample sheet against the wall so they could view the color.
116. HSPT-R2-004 - Answer D: a complication that prompts a creative solution
The missing color forces the partners to redesign the sky imaginatively.
117. HSPT-R2-005 - Answer B: Unexpected limits can lead to worthwhile new ideas.
Lacking blue paint leads to a night-sky design that engages viewers.
118. HSPT-R2-006 - Answer D: Cleaned shells or shaped blocks
The passage directly names both materials as firm surfaces for young oysters.
119. HSPT-R2-007 - Answer A: Their rough surfaces slow some waves.
Slower waves may reduce routine shoreline erosion in suitable locations.
120. HSPT-R2-008 - Answer B: It explains reef benefits, restoration methods, and conditions for success.
The passage develops these three aspects in sequence.
121. HSPT-R2-009 - Answer C: work together favorably
A project succeeds when water conditions, survival, and monitoring align or combine favorably.
122. HSPT-R2-010 - Answer A: Conditions and oyster survival determine whether the reef develops.
Placement alone is insufficient; teams must track survival and changing site conditions.
123. HSPT-R2-011 - Answer C: To explain how imitation can support the development of independent skill
The passage presents imitation as temporary structure leading to original choices.
124. HSPT-R2-012 - Answer D: Adapt what has been observed
The third paragraph explicitly says a learner must eventually adapt observed methods.
125. HSPT-R2-013 - Answer A: A model is most useful when it leads toward independent choices.
The railing comparison shows that support should help learners move independently.
126. HSPT-R2-014 - Answer B: restricting further development
A method becomes limiting when failure to adjust it prevents further growth.
127. HSPT-R2-015 - Answer C: can provide temporary support during learning
Like a railing, imitation assists progress but is not meant to be held forever.
128. HSPT-R2-016 - Answer D: thoughtful and balanced
The author considers both the usefulness and limitations of imitation in a measured way.
129. HSPT-R2-017 - Answer A: Beneath the classroom table
The passage directly identifies the location.
130. HSPT-R2-018 - Answer B: It offers a place and tools for work that does not require the robot.
The team can revise code and designs there.
131. HSPT-R2-019 - Answer C: fastened
Nadia fastens the key to a visible cord.
132. HSPT-R2-020 - Answer D: decision to prevent the same mistake
The cord represents a practical lesson learned.
133. HSPT-R2-021 - Answer A: Adaptability can turn a setback into productive work.
The team changes plans and still solves problems.
134. HSPT-R2-022 - Answer B: gravity
Gravity pulls the heavier droplets downward.
135. HSPT-R2-023 - Answer C: It would cause much of the air to flow around it.
The passage explicitly contrasts solid walls with mesh.
136. HSPT-R2-024 - Answer D: How fog nets collect water and why their success varies
The passage explains operation, variables, and limits.

137. HSPT-R2-025 - Answer A: Local results help show whether a larger installation is worthwhile.
Performance depends strongly on the site.
138. HSPT-R2-026 - Answer B: Testing helps determine where fog nets can usefully supplement water supplies.
This captures testing, suitable locations, and a supporting role.
139. HSPT-R2-027 - Answer C: Place-name research combines varied sources to uncover complex naming histories.
The passage emphasizes multiple names, sources, and evidence.
140. HSPT-R2-028 - Answer D: Maps, letters, government records, and oral histories
The third paragraph lists these sources.
141. HSPT-R2-029 - Answer A: Each kind of source may contain errors or omit information.
The passage describes different strengths and weaknesses.
142. HSPT-R2-030 - Answer B: keep
Family stories may keep information over time.
143. HSPT-R2-031 - Answer C: rests on earlier names and decisions
The metaphor presents the current name as one stage in a history.
144. HSPT-R2-032 - Answer D: By introducing varied name origins, describing conflicting versions, and explaining research methods
The passage moves from complexity to evidence-based study.
145. HSPT-R2-033 - Answer B: The fountain, tool shed, and pear trees
The passage explicitly lists these three dependable landmarks.
146. HSPT-R2-034 - Answer D: Its arrangement continues to change as people work.
The shifting routes and plantings show that change is normal there.
147. HSPT-R2-035 - Answer A: remain useful despite
The map remains useful even when temporary routes change.
148. HSPT-R2-036 - Answer C: test whether Leah's revised map can handle change
The obstacle demonstrates that landmark-based guidance still works.
149. HSPT-R2-037 - Answer D: A useful solution can emphasize stable information instead of impossible precision.
Leah succeeds by mapping reliable landmarks rather than every changing object.
150. HSPT-R2-038 - Answer B: She places the chairs in a circle.
The first paragraph states that she arranges the chairs in a circle.
151. HSPT-R2-039 - Answer A: An imperfect rehearsal space helps musicians notice how their parts connect.
The unusual room sharpens listening and improves later performance.
152. HSPT-R2-040 - Answer C: To help players hear how each section contributes
Isolating and restoring parts reveals their musical relationships.
153. HSPT-R2-041 - Answer B: powerful sound and careful listening
The auditorium supports volume, while the community room exposes details.
154. HSPT-R2-042 - Answer A: A disappointing change leads him to listen more closely and perform more steadily.
This includes the setback, lesson, and later improvement.
155. HSPT-R2-043 - Answer B: Shadows move as the sun changes position.
The passage explains that a location may be shaded at one time but exposed later.
156. HSPT-R2-044 - Answer D: To explain how shade maps are created and used within broader planning
The passage covers map inputs, applications, and limits.
157. HSPT-R2-045 - Answer C: It helps planners focus improvements where people actually need protection.
Routes and risk information help prioritize useful interventions.
158. HSPT-R2-046 - Answer A: one type of information among several
Shade data is one component of a larger decision process.
159. HSPT-R2-047 - Answer D: It introduces uneven shade, explains mapping methods, then discusses uses and limitations.
The paragraphs follow the stated progression from problem through qualified use.
160. HSPT-R2-048 - Answer C: To complete the bicycle she is restoring for a parade
The first paragraph connects the bell to Nora's parade bicycle.
161. HSPT-R2-049 - Answer B: She recognizes its personal importance to the boy.
She gives it back after seeing the boy respond to a familiar family object.

162. HSPT-R2-050 - Answer A: simple and undecorated
The new bell is contrasted with the distinctive old brass bell.
163. HSPT-R2-051 - Answer D: Nora's changed understanding of what gives an object value
The less musical bell recalls Nora's choice to honor the object's history.
164. HSPT-R2-052 - Answer C: Nora returns a prized borrowed part and gains a broader view of restoration.
This choice includes the main conflict, action, and lesson.
165. HSPT-R2-053 - Answer B: They soak or treat them with smoke-infused water.
The second paragraph describes smoke-infused water as the experimental method.
166. HSPT-R2-054 - Answer A: Fire may create space and nutrients favorable for growth.
The passage links postfire conditions with new opportunities for seedlings.
167. HSPT-R2-055 - Answer D: select appropriately for
Workers must choose a treatment suited to the species and environment.
168. HSPT-R2-056 - Answer C: Smoke can trigger some seeds, but effective use requires attention to species and habitat.
The passage explains the mechanism, its limits, and a careful application.
169. HSPT-R2-057 - Answer B: By explaining a natural response, describing research, and qualifying its practical use
The passage moves from phenomenon to experiment, limits, and application.
170. HSPT-R2-058 - Answer A: The same unfamiliar name appears in three collections.
The repeated name connects separate letters and prompts investigation.
171. HSPT-R2-059 - Answer D: Page images preserve visual clues that typed words may omit.
Handwriting, placement, corrections, and sketches remain visible in page images.
172. HSPT-R2-060 - Answer B: keep available and intact
Ruiz wants future researchers to retain access to potentially useful clues.
173. HSPT-R2-061 - Answer C: the potential importance of details that seem minor
Seemingly minor marks lead to a discovery and shape Ruiz's archival practice.
174. HSPT-R2-062 - Answer D: Careful records should support present knowledge while leaving room for future discovery.
Ruiz combines reliable cataloging with preservation of clues for later research.

Mathematics

175. HSPT-M2-001 - Answer C: 9

Divide first: $24 \div 3 = 8$; then $6 + 8 - 5 = 9$.

176. HSPT-M2-002 - Answer A: 0.35

Dividing 7 by 20 gives 0.35.

177. HSPT-M2-003 - Answer D: 4

Multiplying by 10^3 moves the decimal point three places right, so 0.004 becomes 4.

178. HSPT-M2-004 - Answer B: 72

$2^3 \times 3^2 = 8 \times 9 = 72$.

179. HSPT-M2-005 - Answer C: 10

Substitute: $3(6) - 2(2^2) = 18 - 8 = 10$.

180. HSPT-M2-006 - Answer B: 3

Expand: $10x + 5 = 3x + 26$; then $7x = 21$, so $x = 3$.

181. HSPT-M2-007 - Answer A: $9m + 15$

Monthly charges total $9m$ dollars, and the one-time fee adds \$15.

182. HSPT-M2-008 - Answer D: 75

The rate is $30 \div 4 = 7.5$ kilometers per centimeter; $10 \times 7.5 = 75$.

183. HSPT-M2-009 - Answer B: 52°

Linear-pair angles total 180° , so $180^\circ - 128^\circ = 52^\circ$.

184. HSPT-M2-010 - Answer D: 7 centimeters

Half the perimeter is 17, so the width is $17 - 10 = 7$ centimeters.

185. HSPT-M2-011 - Answer C: $(-3, -4)$

Reflection across the y-axis reverses the x-coordinate while leaving the y-coordinate unchanged.

186. HSPT-M2-012 - Answer A: 14 cups

Three quarts equal 12 cups; adding 2 cups gives 14 cups.

187. HSPT-M2-013 - Answer C: 7°C

Add the increase to the morning temperature: $-4 + 11 = 7^\circ\text{C}$.

188. HSPT-M2-014 - Answer A: 6

The total is $3(4) + 2(7) + 10 = 36$, and $36 \div 6 = 6$.

189. HSPT-M2-015 - Answer B: $1/2$

Five of the ten cards are not purple, so the probability is $5/10 = 1/2$.

190. HSPT-M2-016 - Answer D: The median is 8.

The two middle values are 7 and 9, whose average is 8.

191. HSPT-M2-017 - Answer B: $3 \frac{1}{10}$

Convert to tenths and subtract.

192. HSPT-M2-018 - Answer C: -5

Absolute value gives 8, and $8 - 13 = -5$.

193. HSPT-M2-019 - Answer D: \$54

The discount is \$18, leaving \$54.

194. HSPT-M2-020 - Answer A: $12x - 3$

Distribute and combine constants.

195. HSPT-M2-021 - Answer B: 12

Subtract 6, then multiply by -3 .

196. HSPT-M2-022 - Answer C: 19

$2(9)+1=19$.

197. HSPT-M2-023 - Answer D: $80 - 6t$

Subtract the amount drained from 80.

198. HSPT-M2-024 - Answer A: 9 centimeters

Divide 90 by 10.

199. HSPT-M2-025 - Answer B: 18π inches
Circumference equals π times diameter.
200. HSPT-M2-026 - Answer C: 12 square units
Use one-half base times height.
201. HSPT-M2-027 - Answer D: 340
Multiply meters by 100.
202. HSPT-M2-028 - Answer A: 18 kilometers
The rate is 0.15 km/minute for 120 minutes.
203. HSPT-M2-029 - Answer B: 5 pounds
Eighty ounces equals 5 pounds.
204. HSPT-M2-030 - Answer C: 8
The sum 40 divided by 5 is 8.
205. HSPT-M2-031 - Answer D: $\frac{1}{5}$
After any first result, the second must match it with probability $\frac{1}{5}$.
206. HSPT-M2-032 - Answer A: 13
The range increases by 5, from 8 to 13.
207. HSPT-M2-033 - Answer C: $3\frac{1}{2}$
Multiply $\frac{7}{8}$ by the reciprocal $\frac{4}{1}$ to get $\frac{28}{8} = 3\frac{1}{2}$.
208. HSPT-M2-034 - Answer A: 47
Forty-seven has no positive factors other than 1 and 47.
209. HSPT-M2-035 - Answer D: 13
Perform division and multiplication first: $6 + 12 - 5 = 13$.
210. HSPT-M2-036 - Answer B: $\frac{2}{5}$
There are 30 students, and $\frac{12}{30}$ simplifies to $\frac{2}{5}$.
211. HSPT-M2-037 - Answer C: 17
Distribute to get $3x - 12 = 2x + 5$, so $x = 17$.
212. HSPT-M2-038 - Answer A: $2n - 7 \leq 19$
Twice n is $2n$, seven less is $2n - 7$, and at most means $\leq$.
213. HSPT-M2-039 - Answer D: 22
The y -values rise by 4 per x ; the rule is $y = 4x + 2$.
214. HSPT-M2-040 - Answer B: $9t + 6 = 60$
Ticket cost is $9t$, with one additional \$6 fee.
215. HSPT-M2-041 - Answer C: 19
Their sum is 180° , so $8x + 28 = 180$ and $x = 19$.
216. HSPT-M2-042 - Answer A: 17
The Pythagorean theorem gives $\sqrt{(8^2 + 15^2)} = \sqrt{289} = 17$.
217. HSPT-M2-043 - Answer D: 202 square units
Surface area is $2(4 \times 5 + 4 \times 9 + 5 \times 9) = 202$.
218. HSPT-M2-044 - Answer B: 27 feet
Multiply 4.5 inches by 6 feet per inch.
219. HSPT-M2-045 - Answer C: 2 hours 36 minutes
From 10:47 to 1:23 is 2 hours 36 minutes.
220. HSPT-M2-046 - Answer A: 12
With $x = 12$, the ordered middle value remains 9.
221. HSPT-M2-047 - Answer D: $\frac{7}{12}$
Seven of the 12 tiles are red or blue.
222. HSPT-M2-048 - Answer B: 6
Sixty percent of 30 is 18 yes votes, so $18 - 12 = 6$ were added.
223. HSPT-M2-049 - Answer D: 60 gallons
The added 18 gallons equals $\frac{3}{10}$ of capacity, so capacity is $18 \div 0.3 = 60$.
224. HSPT-M2-050 - Answer B: 6.2×8.1
Estimating gives $6 \times 8 \approx 48$, and the exact value 50.22 is closest to 50.

225. HSPT-M2-051 - Answer A: 8:15
 Scale 4:7 to 8:14; combining with 14:15 gives a:c = 8:15.

226. HSPT-M2-052 - Answer C: $3x - 17$
 Distribute and combine: $8x - 12 - 5x - 5 = 3x - 17$.

227. HSPT-M2-053 - Answer D: 15
 Substitute -3: $(-3)^2 - 2(-3) = 9 + 6 = 15$.

228. HSPT-M2-054 - Answer B: $12/r + 18/(r + 3)$
 Time equals distance divided by speed for each part of the ride.

229. HSPT-M2-055 - Answer A: 8
 Let width be w: $2[(2w + 3) + w] = 54$, so $6w + 6 = 54$ and $w = 8$.

230. HSPT-M2-056 - Answer C: 8
 The exterior angles total 360° , and $360 \div 45 = 8$.

231. HSPT-M2-057 - Answer D: 78.5 square units
 The diameter is 10, so radius is 5 and area is $3.14 \times 5^2 = 78.5$.

232. HSPT-M2-058 - Answer B: 15
 The scale factor is $9/6 = 1.5$, so $EF = 10 \times 1.5 = 15$.

233. HSPT-M2-059 - Answer A: 10 ounces
 Five pounds is 80 ounces; $80 \div 8 = 10$ ounces.

234. HSPT-M2-060 - Answer C: 221 miles
 The rate is $156 \div 6 = 26$ miles per gallon; $26 \times 8.5 = 221$.

235. HSPT-M2-061 - Answer D: 42
 The floor area is 14.7 square meters; $14.7 \div 0.35 = 42$.

236. HSPT-M2-062 - Answer B: 85
 The total must be 420; the four known scores total 335, leaving 85.

237. HSPT-M2-063 - Answer A: $1/4$
 Each spin has probability $3/6 = 1/2$ of even; $1/2 \times 1/2 = 1/4$.

238. HSPT-M2-064 - Answer C: The mean increases by 5, and the range stays the same.
 Adding a constant shifts the mean by that constant but does not change the spread.

Language

239. HSPT-L2-001 - Answer D: During the long rehearsal, the actors remained focused.
A comma correctly follows the introductory prepositional phrase.
240. HSPT-L2-002 - Answer A: The bicycle's tires needed air.
The apostrophe before s shows that the tires belong to one bicycle.
241. HSPT-L2-003 - Answer C: Nora packed four things: gloves, boots, a scarf, and a hat.
A colon correctly introduces a list after the complete clause.
242. HSPT-L2-004 - Answer D: We toured Yellowstone National Park in August.
The park's proper name and the month are correctly capitalized.
243. HSPT-L2-005 - Answer A: Captain Rosa Vega speaks French on Thursdays.
The title before a name, language, and day are capitalized correctly.
244. HSPT-L2-006 - Answer A: accommodate
Accommodate is correctly spelled with two c's and two m's.
245. HSPT-L2-007 - Answer B: The shelves were nearly identicle.
Identicle is misspelled; the correct spelling is identical.
246. HSPT-L2-008 - Answer B: The collection of stamps is valuable.
The singular subject collection requires the singular verb is.
247. HSPT-L2-009 - Answer C: She and Mateo organized the files.
The subject pronoun she is correct because she performs the action.
248. HSPT-L2-010 - Answer D: had checked
Past perfect shows that checking occurred before the alarm sounded.
249. HSPT-L2-011 - Answer B: lay
Lay is the present-tense verb meaning to place an object somewhere.
250. HSPT-L2-012 - Answer C: We stopped because the road was closed.
This sentence states the cause directly without redundant phrasing.
251. HSPT-L2-013 - Answer A: A seed-swap shelf at the public library would help local gardeners share useful resources.
This revision clearly states both the proposal and its central benefit.
252. HSPT-L2-014 - Answer C: Ultimately,
Ultimately introduces the paragraph's concluding statement about the exchange's overall benefits.
253. HSPT-L2-015 - Answer D: People would leave labeled packets of extra seeds for visitors to take, and those visitors could later contribute seeds from their own gardens.
This revision joins both actions clearly while preserving their logical sequence.
254. HSPT-L2-016 - Answer D: The gate opened; the crowd entered.
A semicolon correctly joins related independent clauses.
255. HSPT-L2-017 - Answer A: "Please close the window," said Ravi.
The comma belongs inside the closing quotation mark.
256. HSPT-L2-018 - Answer B: We crossed the Rocky Mountains in June.
The geographic name and month are capitalized.
257. HSPT-L2-019 - Answer C: Senator Kim spoke at Central High School.
The title, name, and full school name are capitalized.
258. HSPT-L2-020 - Answer D: independent
Independent is the standard spelling.
259. HSPT-L2-021 - Answer A: The room had a pleasent aroma.
Pleasant should be pleasant.
260. HSPT-L2-022 - Answer B: similarities
Similarities is spelled correctly.
261. HSPT-L2-023 - Answer C: A list of names appears on the screen.
The singular subject list takes appears.
262. HSPT-L2-024 - Answer D: The job requires measuring, cutting, and assembling.
All three items are gerunds.

263. HSPT-L2-025 - Answer A: The lantern flickered during the storm.
It has a complete subject and predicate.
264. HSPT-L2-026 - Answer B: theirs
Theirs is the possessive pronoun.
265. HSPT-L2-027 - Answer C: however
However signals contrast.
266. HSPT-L2-028 - Answer D: Finding Shared Tools Online
The title captures the proposed online borrowing guide.
267. HSPT-L2-029 - Answer A: An online borrowing guide would help residents locate shared tools across town.
The revision states the proposal and its purpose.
268. HSPT-L2-030 - Answer B: With reliable information in one place, residents could borrow equipment more easily and avoid unnecessary trips.
The conclusion restates the guide's overall practical benefit.
269. HSPT-L2-031 - Answer A: After the final bell, the hallway became quiet.
A comma follows the introductory prepositional phrase.
270. HSPT-L2-032 - Answer C: Bring these supplies: paper, tape, and scissors.
A colon follows a complete clause that introduces a list.
271. HSPT-L2-033 - Answer B: The two captains' uniforms were ready.
The plural possessive captains' takes an apostrophe after s.
272. HSPT-L2-034 - Answer D: We study French on Tuesdays.
A language and a day of the week are capitalized.
273. HSPT-L2-035 - Answer A: My aunt visited Lake Superior during spring break.
The family relationship is lowercase without a name; the geographic proper noun is capitalized.
274. HSPT-L2-036 - Answer C: necessary
Necessary is the standard spelling.
275. HSPT-L2-037 - Answer B: The committee recommended a separate entrance.
Committee, recommended, separate, and entrance are all spelled correctly.
276. HSPT-L2-038 - Answer D: The coach spoke to Elena and me.
The object pronoun me follows the preposition to.
277. HSPT-L2-039 - Answer A: Wearing a reflective vest, the cyclist crossed the bridge.
The opening modifier logically describes the cyclist.
278. HSPT-L2-040 - Answer C: Jamal opened the box and removed the label.
Both verbs consistently use the simple past tense.
279. HSPT-L2-041 - Answer B: The hawk circled above the field.
Circled states the action clearly and precisely.
280. HSPT-L2-042 - Answer D: The meeting was postponed because of rain.
The sentence expresses the full idea without unnecessary words.
281. HSPT-L2-043 - Answer A: affect
Affect is the verb meaning influence.
282. HSPT-L2-044 - Answer B: Sentence 4
The art club's mural is unrelated to reducing lunchroom noise.
283. HSPT-L2-045 - Answer C: After sentence 5
After sentence 5, it summarizes the evidence before the recommendation.
284. HSPT-L2-046 - Answer C: The clouds gathered, but the game continued.
A comma precedes the coordinating conjunction joining two independent clauses.
285. HSPT-L2-047 - Answer A: "Please close the gate," Maya said.
A comma belongs inside the closing quotation mark before the dialogue tag.
286. HSPT-L2-048 - Answer D: Professor Ahmed teaches history at Westlake University.
A title before a name and the university's proper name are capitalized; history is not.
287. HSPT-L2-049 - Answer B: Our class visited the National Air and Space Museum in July.
The institution's official name and the month are capitalized.

288. HSPT-L2-050 - Answer C: accommodate
Accommodate is spelled with two c's and two m's.
289. HSPT-L2-051 - Answer A: The audience applauded the remarkable performance.
Audience, applauded, remarkable, and performance are spelled correctly.
290. HSPT-L2-052 - Answer D: priviledge
The correct spelling is privilege.
291. HSPT-L2-053 - Answer B: Neither the coaches nor the captain is available.
With neither...nor, the verb agrees with the nearer subject, captain.
292. HSPT-L2-054 - Answer C: Although the trail was steep, we reached the overlook.
The dependent opening clause is joined to an independent clause.
293. HSPT-L2-055 - Answer A: The job requires sorting files, answering calls, and greeting visitors.
All three items use matching gerund forms.
294. HSPT-L2-056 - Answer D: except
Except means excluding Theo.
295. HSPT-L2-057 - Answer B: however
However signals the contrast between the routes' advantages.
296. HSPT-L2-058 - Answer C: When Ava spoke with Priya, Ava was carrying the folder.
Repeating Ava clearly identifies who carried the folder.
297. HSPT-L2-059 - Answer A: Residents label donated tools, record each loan in a notebook, and post safety reminders beside the shelf.
The revision combines the related procedures clearly with parallel verbs.
298. HSPT-L2-060 - Answer D: Sentence 7
Sentence 7 looks ahead and reinforces the shelf's continued usefulness.
